

VISHVANTH S

FULL-STACK DEVELOPER

+91 7871710153 | vishvanth57@gmail.com | Ariyalur, Tamil Nadu
[Portfolio](#) | [LinkedIn](#) | [GitHub](#)

PROFILE SUMMARY

Full-stack developer and Computer Science undergraduate with hands-on experience building end-to-end web applications, from automated testing pipelines to interactive dashboards. Comfortable across the stack with Next.js, TypeScript, Python, and SQL/NoSQL databases, with a growing focus on AI-assisted tooling and web accessibility. Strong problem-solving mindset with a track record of shipping self-directed projects from concept to deployment.

TECHNICAL SKILLS

Languages: C, C++, Java, HTML, CSS, JavaScript, Dart, Python, SQL.

Frameworks & Libraries: Next.js, React, Flutter.

Databases & Backend: MongoDB, SQL, MySQL, REST APIs, Node.js.

Core Strengths: Problem Solving, Project Management, Critical Thinking, Communication, Leadership.

PROJECTS

SecureCity | Civic Safety & Incident Reporting Platform

Flutter, Dart, Google Maps API, Geolocator

- Developed a Flutter-based civic safety platform enabling community-driven reporting and tracking of urban hazards.
- Integrated Google Maps API, Geolocator, and image upload functionality for accurate geotagged incident reporting.
- Implemented geofencing and proximity-based notifications to alert users about nearby safety threats.
- Designed SOS emergency assistance with one-tap emergency dialing and quick access to emergency contacts.
- Built modular UI components following Material Design principles to improve usability and responsiveness.

Basilisk's Blind Spot | AI-Powered Web Accessibility Auditor

Next.js, TypeScript, Playwright, Axe-core, Prisma, Tailwind CSS, Vercel

- Built a full-stack accessibility auditing platform that evaluates websites against WCAG 2.1 AA standards.
- Developed an automated scanning engine with Playwright and Axe-core to detect violations such as missing alt text, poor color contrast, invalid ARIA attributes, and keyboard navigation issues.
- Implemented interactive reports with severity classification, category-wise scoring, screenshots, and actionable remediation suggestions.
- Designed RESTful API endpoints with the Next.js App Router and integrated Prisma ORM for persistent scan history and report storage.
- Created a responsive dashboard with real-time scan summaries and historical accessibility analytics.

Smart Classroom System | AI-Assisted Attendance & Classroom Management

- Developed a smart attendance system using QR code technology with time-restricted scanning to eliminate proxy attendance and verify real-time presence.
- Designed an integrated chatbot for seamless student-teacher communication and built an assignment tracking module for submissions and deadlines.
- Created a performance analytics dashboard to track student progress and engagement, structured on a Python backend with SQL and MongoDB.

SpeedSpotMapper | Network Signal Analysis Tool

- Developed a network analysis tool to measure real-time upload/download speeds and identify optimal signal locations within a 5-meter radius.
- Designed a recommendation system for the best SIM/network provider based on performance data, with location-based navigation to the strongest signal spot.

EDUCATION

Vellore Institute of Technology, Chennai

B.Tech - Computer Science | CGPA: 8.44 / 10.0

2024 - 2028

Velammal Bodhi Campus, Ponneri

Higher Secondary Education | 82.2%

2022 - 2024

CERTIFICATIONS

- Google AI professional Certificate – Google.
- Google Cybersecurity Professional – Google.
- Introduction to IoT - Netcad Academy
- Network Basics - Netcad Academy
